Hiring Manager
L3Harris Technologies
Nashville, TN / Dallas, TX

Dear Hiring Manager,

I am writing to express my interest in the **Lead, Systems Engineer** position at L3Harris Technologies. With a background in systems-oriented analysis, technical documentation, and stakeholder coordination within regulated and mission-driven environments, I am drawn to L3Harris's commitment to delivering reliable, end-to-end solutions in support of national security.

In my current role, I have worked extensively with complex technical information, translating requirements into structured documentation and maintaining accuracy across evolving systems and processes. I regularly engage with multiple stakeholders to ensure clarity, traceability, and alignment between operational needs and technical outcomes. This experience has strengthened my ability to evaluate system-level impacts, manage competing priorities, and contribute to projects that require precision and accountability.

I am particularly interested in this role's emphasis on requirements elicitation, configuration control, and compliance with U.S. Government security regulations. My experience working in environments that demand careful documentation, adherence to standards, and disciplined change management aligns well with the expectations outlined for this position. I am comfortable communicating across technical and non-technical teams and serving as a dependable point of contact to support program objectives.

L3Harris's focus on values, professional growth, and mission excellence strongly resonates with how I approach my work. I would welcome the opportunity to contribute my skills in systems thinking, documentation, and technical coordination to support ForceX programs and broader organizational goals.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my background and interests align with the needs of L3Harris Technologies.

Sincerely,

Christopher McEvoy

Professional Summary

Detail-oriented technical professional with experience in systems-oriented analysis, requirements documentation, and stakeholder coordination. Demonstrated ability to support complex, regulated projects through structured documentation, traceability, and disciplined communication. Interested in contributing to mission-critical systems engineering efforts within a defense environment.

Education

Bachelor of Science in Information Systems Management

University of Alabama in Huntsville (UAH)
Expected Graduation: May 2027

Technical & Professional Experience

Student Specialist V – CSDA Operations

University of Alabama in Huntsville / NASA IMPACT
Huntsville, AL
May 2023 – Present

- Develop and maintain technical documentation supporting data access, validation workflows, and operational processes.
- Translate program requirements into structured tools and procedures to support compliance and operational accuracy.
- Coordinate with internal stakeholders to manage system access, approvals, and process changes.
- Support tracking and closure of operational tasks to ensure timely fulfillment and adherence to standards.
- Contribute to continuous improvement of documentation and workflows in a regulated research environment.

NASA DEVELOP Participant

NASA DEVELOP National Program

Huntsville, AL

Jan 2025 – Aug 2025

- Supported interdisciplinary projects requiring structured analysis, documentation, and stakeholder engagement.
- Worked with diverse technical teams to assess requirements and communicate findings to partners.
- Produced formal deliverables aligned with program standards and timelines.

Skills

- Systems and requirements documentation
- Stakeholder engagement and coordination
- Configuration and process tracking
- Technical writing and reporting
- Data validation and quality assurance
- Python scripting
